1969 Buick 350 V8 Engine

Buick built a 350 engine starting in 1968, joining GM in the family of small-block V8 engines. Buick's 350 was different than the rest of GM's 350 engines. It had a wider bore inside the engine, which made it wider, and it had an external oil pump, which was unusual for engines at the time. The 350 was used from 1968 to 1980 in large Buicks.

350 Buick Engine Specifications | It Still Runs

Buick adopted the popular 350 cu in (5.7 L) size in 1968 for their final family of V8 engines, the 350, which was produced through 1980. Although it shared the displacement of the other GM small blocks, including the Chevrolet 350 , Oldsmobile 350 , and Pontiac 350 (although the Pontiac was technically a 354) , the Buick blocks were of a substantially different proprietary company design.
