1986 Ford F150 Engine

The seventh generation of the Ford F-Series is a range of trucks that was produced by Ford from the 1980 to 1986 model years. The first complete redesign of the F-Series since 1965, the seventh generation received a completely new chassis and body. Distinguished by its squarer look and flatter body panels, this generation marked several firsts for the F-Series, including the introduction of ...

Ford F-Series (seventh generation) - Wikipedia

The 1986 F-150 featured a Windsor V-8, with either a 5L or 6L electronic fuel injector. Some models had a six-cylinder engine, others featured an eight-cylinder. The engines produced from 115 to 150 horsepower. It was an all-wheel-drive vehicle.
