Bashar Katirji Electromyography In Clinical

Structure. The thoracodorsal nerve arises from the brachial plexus.It derives its fibers from the sixth, seventh, and eighth cervical nerves.It is derived from their ventral rami, in spite of the fact that the latissimus dorsi is found in the back.The thoracodorsal nerve is a branch of the posterior cord of the brachial plexus, and is made up of fibres from the posterior divisions of all three ...

Thoracodorsal nerve - Wikipedia

In neuroscience, an F wave is one of several motor responses which may follow the direct motor response (M) evoked by electrical stimulation of peripheral motor or mixed (sensory and motor) nerves. F-waves are the second of two late voltage changes observed after stimulation is applied to the skin surface above the distal region of a nerve, in addition to the H-reflex (Hoffman's Reflex) which ...
