"Appreciative Inquiry is about the coevolutionary search for the best in people, their organizations, and the relevant world around them. In its broadest focus, it involves systematic discovery of what gives "life" to a living system when it is most alive, most effective, and most constructively capable in economic, ecological, and human terms.

Excerpt "A 'theory of change' explains how activities are understood to produce a series of results that contribute to achieving the final intended impacts. It can be developed for any level of intervention - an event, a project, a programme, a policy, a strategy or an organization. A theory of change can be developed for an intervention: where objectives and activities can be

Record the change in the change control system: By this way, evaluation history of a former change request can be seen in future. Adjust the project management plan, project documents, and baselines: Please note that 6th, 7th and 8th steps of the change management are executed only if the change is approved by the change control board.

Learn the 8 Steps of Change Management Process

The intervention mapping approach of Bartholomew et al. makes an extensive use of the logic model through the whole life-cycle of a health promotion program. Since this method can start from as far as a vague desired outcome (author's example is a city whose actors decide to address "health issues" of the city), planners go through various steps in order to develop effective interventions and ...
