Transmissions used in later AMC vehicles came with either a 21-spline or a 23-spline output shaft. Transmissions coupled to four-cylinder engines typically used 21-spline output shafts. The 23-spline manual transmission was universal in the Eagle lines and was generally used with six-cylinder applications. All transfer cases were available with inputs matching either 21- or 23-spline shafts ...

3. Transmission and Transfer Case. If you have the 4.0-liter with the factory5-speedd manual, you can usually adapt it to the LS motor pretty easily, although, it does move forward by more than an inch. If you have an automatic you are going to want to swap it out for a GM unit, though most of those can be adapted to the factory transfer case.

Basically if your Jeep was built on or after 1998, it is pretty easy to get your Jeep build sheet and I'll explain how in this article. But if your Jeep was built prior to 1998 you are going to have a tougher time getting a hold of it, but there may still be hope. I'll give those of you with older Jeeps some resources at the end of the article.
