R. Pearson's Pasteur, Plagiarist, Imposter, originally published in 1942, serves as the introduction. It details some of the reasons for the rancorous relationship between Louis Pasteur and Antoine Béchamp. Pearson points out many of the problems in Pasteur's work, and provides details, statistics and evidence to support his case.

Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity of life.

In biology, taxonomy (from Ancient Greek τάξις () 'arrangement', and -νομία () 'method') is the scientific study of naming, defining (circumscribing) and classifying groups of biological organisms based on shared characteristics. Organisms are grouped into taxa (singular: taxon) and these groups are given a taxonomic rank; groups of a given rank can be aggregated to form a more ...
