Process Modeling And Comparison Study Of

Process models are designed using so-called process modeling techniques (also called languages or notations), i.e., sets of graphical constructs and rules how to combine these constructs. Over time, a wide range of such process modeling techniques has been made available, and used, in organizations,

An Exploratory Study of Process Modeling Practice with BPMN

Rate-based process modeling technology has matured and is increasingly gaining acceptance over traditional equilibrium-stage modeling approaches. [Taylor et al. Chem. Eng. Prog. 2003, 99, 28–39] Recently comprehensive pilot plant data for carbon dioxide (CO₂) capture with aqueous monoethanolamine (MEA) solution have become available from the University of Texas at Austin.
