Shape of Australia's economy - Grattan Institute
There is a considerable chronological overlap between the previous section, which surveyed the growth of a colonial economy during the nineteenth century based on the exploitation of natural resources, and this one because it is a convenient way of approaching the two most important developments in Australian economic history between Federation and the 1970s: the enormous increase in government regulation after 1901 and, closely linked to this, the expansion of domestic manufacturing, which ...

The Economic History of Australia from 1788: An Introduction
The mining sector, which has formed the backbone of Australia's economic success over the past decade, continues almost unabated, as a resurgent China keeps buying iron ore and coal.

How COVID-19 is remaking the economy
Australia's economy is dominated by the service sector (65 percent of total GDP). Yet its economic success in recent years has been based on the mining (13.5 percent of GDP) and agriculture (2 percent of GDP) as the country is a major exporter of commodities. Other sectors include: manufacturing (11 percent) and construction (9.5 percent).
