The Science of Magic - The Nature of Things: Science ...

So it works both ways. Magick defines science, science defines magick. It might seem contradictory, or a circular argument. You’d be right from a conventional sense. but opposites are in fact more similar than different, I would even go as far to say they are the same thing. From a Thelema

point of view, one would say "0=2".

The Science of Magick - The King Paimon

Interest in magic methods can be traced back throughout recorded history, but in the past 15 years, the Science of Magic has recently been undergoing a renaissance. The Westcar Papyrus dates to around the 18th Century BCE and seems to tell the story of a magician performing 'miracles' in the court of the Egyptian pharaoh Khufu.

The science of magic - Home | Facebook

The question of whether magic is a science will therefore be answered differently, depending on who you ask. But there have been some improvements in this area. For example, astral projection has now been well-researched, and there is actual scientific data showing that astral projection is a real phenomena.

Is Magic a Science? - An Occult Perspective!

But a science of magic centers primarily around experiential effects, not tricks (Rensink and Kuhn, 2015). The first level of our framework above the base, for instance, focuses on aspects of experience that are largely unique to magic.

Science is the study of anything through observation and experiment. The Oxford Dictionary has a much longer definition, however it is the same. (Oxford Dictionary) Sometimes, what is believed in science is seen as "fact." Science is not necessarily a "fact-based" subject, as mathematics is. Through testing and experimentation, science is more or less an experimental subject.
