Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

What Trans Fluid In A

Manual transmission fluid can vary, however, using either plain motor oil, a transmission oil known as heavyweight hypoid gear oil, or automatic transmission fluid. The type of transmission fluid to use in vehicles with standard transmissions can usually be found in the maintenance section of the owner's manual. While the primary function of auto transmission fluid is to lubricate the various parts of the transmission, it can serve other functions as well: Clean and protect metal surfaces ...

What is Transmission Fluid and What Does it Do ...

Jump to navigation Jump to search. Automatic transmission fluid. Automatic transmission fluid (ATF) is a kind of transmission fluid used in vehicles with self-shifting or automatic transmissions. It is typically coloured red or green to distinguish it from motor oil and other fluids in the vehicle.
